

EXPRESSION OF INTEREST FOR SUPPLY OF AQUACULTURE EQUIPMENTS FOR ECHO NETWORK AFRICA (ENA)

Date: 11th June 2024

INTRODUCTION

Echo Network Africa Foundation (ENAF) is a Pan African philanthropic institution that works with like-minded stakeholders to empower, position and advocate for girls and women in Africa. Founded in 1982 as Kenya Women Holdings (KWH) and later re-branded in 2018 to Echo Network Africa (ENA), the vision of ENAF is an inclusive society where girls and women enjoy full rights and participate in the life of the society. ENAF intentionally focuses interventions on girls and women with special attention to young women, women with disabilities and women from marginalized communities.

In its 2023-2027 Strategic Plan, ENAF articulates a retention, growth and expansion strategy aimed at replicating and scaling program initiatives from Kenya to other countries in Africa. In addition to the decision made by the Board of Directors in 2024 to re-brand ENA to ENAF, the first Country Office was incorporated in Kenya taking over implementation of program initiatives formally undertaken by ENAF. ENAF, known simply as The Foundation, is therefore solely responsible for resource mobilization and management as well as Coordination of Country Offices and Associates while Country Offices including the Kenya Country Office are responsible for program Implementation. ENAF has retained the catalysing approach whose core is to work with Local Implementing Partners (LIPs) to maximize on impact and accelerate attainment of results.

Current programme and anchor initiatives include Community Resilience and Livelihoods; Women's Leadership, Political Participation and Governance; Peace and Conflict Resolution; Women's Financial Inclusion and Girls Excel. ENA Kenya is supported by the following Anchor Centers: Talent Development Management and Administration; Communication and Public Relations; Information, Communication, and Technology; Special Projects; Legal; Internal Audit; Risk & Compliance; and Planning, Monitoring & Evaluation.

ITEM NO	ITEM	SPECIFICATIONS	QUANTITY
1	HDPE CAGES	<ul style="list-style-type: none"> • The cage is 10m in diameter with a depth of 7m cage nets • The cage has four net Types; <ul style="list-style-type: none"> (i) predator net (ii) Bag net (iii) Fingerlings Net (iv) Bird net • cages are circular in shape • The frame colour is black with a light blue stripe • The floating pipe is 200mm 	4

		<ul style="list-style-type: none"> • Cage bracket of 20mm • The nets should be knotless/machine sewed • Must be double collar tube and a handrail tube in HDPE 100mm polyethylene plastic. • Must be adaptable to the local conditions. • Must be flexible, strong and resistant to corrosion. • Must possess injection moulded brackets attached with stoppers and dowels around the full circumference. • Must possess evenly distributed pressure throughout the structure. • The advantages of black HDPE cages are: <ul style="list-style-type: none"> (i)The black carbon controls UV radiation and hence helps in controlling the degeneration of HDPE cages. (ii)Carbon black disperses uniformly in the polymers hence helping to have a uniform distribution of resistance. 	
2	In-built all-in-one Solar Light.	<ul style="list-style-type: none"> a. Model MS 250_2 Power- 50 WD b. Solar 18V/65 W c. Battery 12.8V/230.4 wh d. Gross Weight 16 kg—This may vary 	4
